Comments:								
<p>10/04 meeting notes: Guardian ops update. 75 buckets through the hydro-aeration station, no grass problems. Total of 555 buckets through to date. Good communications with Advent and ATK. Next week a 1" screen will be used at the hydro-aeration station to assess the possibility of using only that screen instead of two screens. More concrete pads will be poured in the near future. No safety or security issues. Dust control measures have been used. Asbestos monitoring results from 10/3 are about three magnitudes lower than action level. Dust control levels are low. EPA OSC Charlie Fitzsimmons recommends asbestos sampling at excavation and hydro-aeration station and remove upwind. No work on Monday for 10/8, Columbus Day holiday. Ceased ops at 1530 on Tuesday 10/9 due to heavy rain. Wednesday 10/10 site visitors from EPA and state observed operations. Ceased ops at 1200 on Thurs 10/11 due to heavy rain.</p>
